ABOUT ROYAL FLOWERS

Founded in 1991, Royal Flowers is one of the world’s leading suppliers of high-quality flowers. Our enterprise, which employs more than 1,000 people worldwide, consists of a Sales and Marketing operation in Miami, Florida, and more than 130 hectares under greenhouses in the Andean highlands of Ecuador. Here, we cultivate over 100 varieties of premium roses in perfect year-round growing conditions, as well as hydrangeas and other flowers and foliage. Over 10 million roses are exported per month to every corner of the globe.

PHILOSOPHY

Royal Flowers is committed to being a force for positive social and economic growth in the regions where we operate. We’ve partnered with longstanding organizations in Ecuador that enforce fair wages, provide medical care and fight child labor, and two of our farms have on-site medical centers that serve employees free of charge. Our valued workers also receive complimentary lunch and transportation to and from the farms each day.
Royal Flowers is serious about protecting the environment, and to that end we’ve partnered with sustainable farming associations focused on lowering the carbon footprint of Ecuadorian floriculture. We irrigate our farms with melting glaciers and rain water, and limit our use of pesticides, fungicides and non-recyclable materials. We also carry a number of important certifications that distinguish us from competitors:

**Rainforest Alliance**
Our flowers are from Rainforest Alliance Certified™ farms, which helps to ensure that Royal Flowers farms are managed according to rigorous environmental, social and economic standards. This important distinction conserves wildlife, safeguards soils and waterways, protects workers and their families, and supports local communities to help create long-term sustainability.

**More Profitable Sustainability**
MPS monitors each farm’s use of chemicals, as well as monthly water and energy consumption, and ensures the proper application and handling of chemical agents. This internationally recognized organization has awarded Royal Flowers with an A+ rating - its highest distinction.

**FlorEcuador**
FlorEcuador has a number of important functions: They ensure compliance with Ecuadorian legislation on social and environmental issues to promote sustainable farming; they work to minimize the environmental impact of Ecuadorian floriculture by limiting the use of pesticides and other chemicals; and they ensure that all employees are of legal working age, to help eliminate child labor.
